# HISTORY

---

**Kenneth Capes**, established Métier Mixed Concrete in KwaZulu-Natal in 2007, joined by Wayne Witherspoon as Operations Director and Richard Thompson as Financial Director.

Having created an extremely successful business model, our company quickly expanded its operations into the Gauteng market. Our core business is the manufacture and supply of quality ready mixed concrete for the residential, commercial and industrial market in South Africa. We are well position to supply specialized concretes to the higher end of the market and our products range from standard concrete to grouts, mortars, fibre-reinforced, polished and coloured concrete.

Métier was identified by Sephaku Holdings Limited as a leading player in the ready-mix sector and highly strategic to its business, with the result that the company was purchased by Sephaku Holdings Limited in 2013.

Sephaku's assets currently comprise valuable holdings in a range of operating assets which provide raw materials, supplies and / or services in this sector, namely cement and limestone exploration, thereby providing a focused and strategically positioned investment opportunity.

## COMPANY OVERVIEW

Métier Mixed Concrete has state-of-the-art, fully automated concrete batch plants strategically positioned in the greater Durban, Pietermaritzburg and Gauteng areas. Métier Mixed Concrete is a 100% owned subsidiary of Sephaku Holdings Limited, which is a public listed company.

The name “Métier” is from the French, ultimately from Latin ministerium, “service, ministry or employment”. It means an occupation for which one is well suited or an area in which one excels. Métier is synonymous with quality, reliability and service excellence, which represents who we are in the market place.

Part of Métier Mixed Concrete’s commitment to its customers is to ensure that our product range is optimised by innovative research and development. Together, the Managing Director and key staff have in excess of 100 years’ experience within the Ready Mixed Concrete industry. Our valuable and highly-skilled team delivers on the company’s mission to partner with customers to enable success on their concrete projects through providing innovative solutions and accomplish our vision of being a highly-trusted brand and industry leader within Southern Africa.

This dedication, focus, and skill has made Métier an obvious alternative supplier to the traditional ones.

We have specialists in the field of concrete design who focus on ensuring that Métier Mixed Concrete remains at the cutting edge of concrete technology. Métier Mixed Concrete is a Level 4 BBBEE Contributor.

In addition, we recognize that the private sector plays a central role in the development and upliftment of our nation and that corporate social investment (CSI) is an important element of good corporate citizenship, alongside sustainability and good governance. Our CSI focus area is Early Childhood Development with a preference to donating the product we feel so strongly about, ready mix concrete.

Métier Mixed Concrete is capable of producing a wide variety of products for various applications, with a range of strengths.

**To be a highly-trusted  
brand and industry leader  
building a lasting concrete  
legacy in South Africa**

**~ MÉTIER VISION**

# PRODUCTS & SERVICES

*All products are designed by the company's concrete technologists, in line with SABS SANS 2001 CC-1 specifications.*

*All raw materials are sampled and tested in line with SANS 1083.*

The Products and services offered by Métier Mixed Concrete range from standard ready mixed concrete to highly specialised concretes, such as fibre-reinforced concrete, coloured concrete, durability concrete or any other product designed specifically for our clients.

Part of Métier Mixed Concrete's commitment to its customers is to ensure that our product range is optimised by innovative research and development. We have specialists in the field of concrete design who focus on ensuring that Métier Mixed Concrete remains at the cutting edge of concrete technology.

## SPECIALIST CONCRETE

- Industrial Floors
- Roads and Pavement
- Lightweight – 800 – 1000kg/m<sup>3</sup>
- Low Density – 1500Kgs – 2000 kgs/m<sup>3</sup>
- Screeds and Overlays
- Low Heat of Hydration for Mass Concrete
- High Density Shielding
- Durability concrete
- Self-compacting concrete
- Underwater
- High strength  $\leq 70\text{mPa}$

## GEOTECHNICAL

- Piling Grouts
- Piling Concretes
- Soilcrete
- Gunites
- Shotcretes

## FIBRE

- Polyprop Fibre
- Steel Fibre

## MASONRY PRODUCTS

- Mortars
- Plasters
